

# Scanlation Fonts Resource

Font Resource created by: [katyushascans@gmail.com](mailto:katyushascans@gmail.com)

Catalog created by: M8E や

## Contains

1. Blambot
2. Comiccraft
3. Kimberly Geswein
4. Miscellaneous Fonts

Note: This Collection is not up-to-date with latest releases, if you have any font recommendations please mention them.

This folder is a compilation of fonts used for scanlation.

Many have had family names slightly altered from versions you can find online specifically for ease of use, so expect a pile of duplicates if you just throw all this in your current folder or incompatibilities if you share PSD's etc. with other scanlators.

### Compilation Notes:

Where required, separated fonts have been merged into families.

Blambot fonts have all been suffixed with BB, as this is not the case for some usually.

Any folders ending in LMN are modified versions. This may mean accented characters or crossbar I's.

Remember! Many comic fonts have two I's for a reason!

I's with crossbars should ONLY be used for such things as "I'm, I'll, I and I'd".

They are NOT used at the start of a sentence or for character names.

Don't just pick the first font you see! Make sure what you choose blends well with the work itself and don't throw in a new font for every small change, make use of what you have.
